# SeizeControl — a free symptom and seizure diary

SeizeControl helps people record functional seizures, symptoms and observations over time, and produce appointment-ready summaries from their own records.

## What it is not

- Not a diagnostic system
- Not an emergency monitoring platform
- Not a replacement for clinical decision-making
- Not a route for a clinic to open a patient's private records

Anyone can create a free account at https://fndconnect.org.uk/seizecontrol/. Sharing a summary with a clinician is the person's choice.

A professional partnership enquiry does not authorise access to SeizeControl records. Any clinical deployment or data integration needs a separate safety and information-governance assessment.

not been labelled as clinically reviewed. FND Connect is an independent Community Interest Company. It is not part of the NHS and a conversation, enquiry or directory listing does not mean NHS endorsement.
